*You who fear the Lord, praise him! All you offspring of Jacob, glorify him; stand in awe of him, all you offspring of Israel!*

*For he did not despise or abhor the affliction of the afflicted; he did not hide his face from me, but heard when I cried to him.*

*From you comes my praise in the great congregation; my vows I will pay before those who fear him. The poor shall eat and be satisfied; those who seek him shall praise the Lord.*

*May your hearts live forever! All the ends of the earth shall remember and turn to the Lord; and all the families of the nations*

*shall worship before him. For dominion belongs to the Lord, and he rules over the nations. To him, indeed, shall all who sleep in the earth bow down; before him shall bow all who go down to the dust, and I shall live for him. Posterity will serve him; future generations will be told about the Lord, and proclaim his deliverance to a people yet unborn, saying that he has done it.*

(Psalm 22:23-31)

# Home Mechanics Tools & Their Usage...

**HAMMER:** Originally employed as a weapon of war, the hammer nowadays is used as a kind of radar device to locate expensive parts not far from the object we are trying to hit.

**MECHANIC'S KNIFE:** Used to open and slice through the contents of cardboard cartons delivered to your front door; works particularly well on boxes containing seats and motorcycle jackets.

**ELECTRIC HAND DRILL:** Normally used for spinning steel Pop rivets in their holes until you die of old age, but it also works great for drilling mounting holes in fenders just above the brake line that goes to the rear wheel.

**PLIERS:** Used to round off bolt heads.

**HACKSAW:** One of a family of cutting tools built on the pessimism principle. It transforms human energy into a crooked, unpredictable motion, and the more you attempt to influence its course, the more dismal your future becomes.

**OXYACETYLENE TORCH:** Used almost entirely for lighting on fire various flammable objects in your garage. Also handy for igniting the grease inside a brake drum you're trying to get the bearing grease out of.

**WHITWORTH SOCKETS:** Once used for working on older British cars and motorcycles, they are now used mainly for impersonating that 9/16 or 1/2 socket you've been searching for, the last 15 minutes.

**DRILL PRESS:** A tall upright machine useful for suddenly snatching flat metal bar stock out of your hands so that it smacks you in the chest and flings your coffee across the room, splattering it against that freshly painted part you were drying.

**WIRE WHEEL:** Cleans rust off old bolts and then throws them somewhere under the workbench with the

speed of light. Also removes fingerprint whorls and hard-earned guitar calluses in about the time it takes you to say, "Ouc...."

**HOSE CUTTER:** A tool used to cut hoses 1/2 inch too short.

**HYDRAULIC FLOOR JACK:** Used for lowering a motorcycle to the ground after you have installed your new front disk brake set-up, trapping the jack handle firmly under the front fender.

**EIGHT-FOOT LONG WOODEN 2 x 4:** Used for levering a motorcycle upward off a hydraulic jack.

**TWEEZERS:** A tool for removing wood splinters.

**PHONE:** Tool for calling your neighbor to see if he has another hydraulic floor jack.

**GASKET SCRAPER:** Theoretically useful as a sandwich tool for spreading mayonnaise; used mainly for getting whatever it was you stepped in, off your boot.

**E-Z OUT BOLT & STUD EXTRACTOR:** A tool that snaps off in bolt holes and is ten times harder than any known drill bit.

**TIMING LIGHT:** A stroboscopic instrument for illuminating grease build up.

**TWO-TON HYDRAULIC ENGINE HOIST:** A handy tool for testing the tensile strength of ground straps and

brake lines you may have forgotten to disconnect.

**1/2 x 16" SCREWDRIVER:** A large motor mount prying tool that inexplicably has an accurately machined screwdriver tip on the end without the handle.

**BATTERY ELECTROLYTE TESTER:** A handy tool for transferring sulfuric acid from a car battery to the inside of your tool box after determining that your battery is as dead as a door nail, just as you thought.

**METAL SNIPS:** See *hacksaw*.

**TROUBLE LIGHT:** The mechanic's own tanning booth. Sometimes called a drop light, it is a good source of vitamin D, "the sunshine vitamin," which is not otherwise found under motorcycles at night. Health benefits aside, its main purpose is to consume 40-watt light bulbs at about the same rate that shotgun shells might be used during, say, the first twenty minutes of a clay bird shoot. More often dark than light, its name is somewhat misleading.

**PHILLIPS SCREWDRIVER:** Normally used to stab the lids of old-style paper-and-tin oil cans and splash oil on your shirt; can also be used, as the name implies, to round off Phillips screw heads and can double as oil filter removal wrench by stabbing through stubborn oil filters.

**AIR COMPRESSOR:** A machine that takes energy produced in a coal-burning power plant 200 miles away and transforms it into compressed air that travels by hose to a Chicago Pneumatic impact wrench that grips rusty bolts last tightened 60 years ago by someone in Springfield, and rounds them off.

**PRYBAR:** A tool used to crumple the metal surrounding that clip or bracket you need to remove, in order to replace a 50¢ part.
